OK thanks; will put something together on that. Phil lets discuss this – tomorrow or Monday?
Donn – FYI, the cleanup criteria will be proposed in the Proposed Plan after FS review & management approval, and then will be presented for public comment. The final criteria will be selected in the ROD after signatures – so we can't say now what it will be, however we can discuss the risk assessment results and the possible alternatives as presented in previous docs perhaps?

Thanks,

Gary Miller

FYI – According to someone who attended the San Jacinto River Coalition meeting the other evening, two big items widely discussed included the Status of the COE's review of the Cap; and what clean up criteria will be utilized for the Prop Plan.
